

Year 2 Curriculum

Summer term 2

Weeks 3 – 6

Bug hotels are houses for bugs and minibeasts!

You can use recycled materials around your house and garden to build one.

They are great for bugs to live, rest, eat and climb!

Can you design and build a bug hotel in your garden?

You could use wood, bricks, plant pots, kitchen roll tubes, sticks, leaves, bottles, yogurt pots, stones, pine cones and anything else you can find in your house or outside!

Take a picture of your bug hotel to show your teachers!

Here are some examples:
